AgriGold

AGRIGOLD, POWERED BY AGRELIANT GENETICS

AgReliant® GENETICS

Global seed leaders KWS & Groupe Limagrain established AgReliant Genetics on July 1, 2000, providing over 200 years of seed experience and proven global germplasm. From this solid foundation to its legacy brands that have been in the seed business in the US for 85+ years, AgReliant has grown to be the third largest seed corn company in the U.S, a top five North American agriculture research program, and one of the fastest growing independent seed companies in the market.

RESEARCH

We've dedicated our latest research to the northwestern Corn Belt to expand our testing network and focus on geographically targeted germplasm evaluation and corn hybrid production.

AgriGold offers unique choices and diversity for better results, no matter what your challenges are. Not only do we demand higher yields, we breed for adaptability and optimal plant health. We test our seed innovations across a global network to offer the best hybrids suited for your local environment.

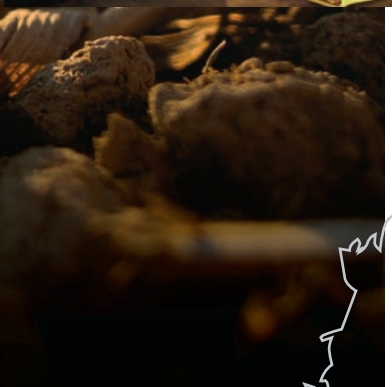
AgriGold's access to AgReliant's global genetic research creates powerful hybrids and an extensive testing program provides high-yielding results. AgriGold seed combined with the agronomic knowledge of our seed representatives ensures you always have a trusted partner in the field.

THE AGRIGOLD STORY

80-118 DAY
CORN MATURITY

0.5-5.2
SOYBEAN RELATIVE MATURITY

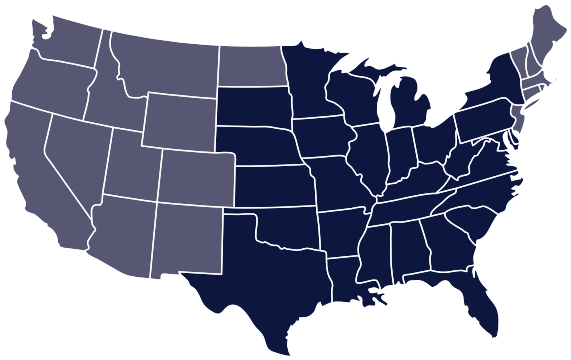
Clarence Akin, founder



85

Founded on a single acre of corn in southern Illinois, AgriGold has produced elite seed corn, backed by proven results and trusted advice for over **85 years**. We are proud to have expanded that commitment to include soybean varieties in our genetic portfolio, while continuing to provide the unmatched agronomic knowledge our customers expect.

1 OF 5 MAJOR SEED COMPANIES COMPANIES DEVELOPING NEW INBREDS & PROPRIETARY GERMPLASMS



LOCAL RESEARCH, TESTING & PRODUCTION

- Stations located throughout the Corn Belt are part of our worldwide research and development team.
- Our advanced full-service production team works year-round to provide a trusted supply of high-quality corn and soybeans.

Products are locally tested through a pre-commercial research program and on-farm trials.

Our key account specialists work directly with farmers to understand their operation, soil types, and product needs.

OUR CUSTOMERS' SUCCESS ALWAYS SHINES THROUGH

The measure of success across today's farms is very different from what it was just a generation ago. New technologies, data science, and greater access to information have leveled the playing field for most growers, making each decision that much more critical in the overall success of their season. This is why AgriGold will always be a direct-to-farm seed company and trusted agronomic advisor for our AgriGold family of growers.

AgriGold's innovative and accelerated new research program is producing some of the most advanced genetics with an industry-leading focus on diversity and product quality. This gives our customers the confidence that they will always have a multitude of high-performance hybrid options for every yield environment on their farm.

BRADEN SHORT
NORRIS CITY, IL

"AgriGold hasn't ever failed for us. Their hybrids shine when you put them where they need to go. Lindsey, my Key Account Specialist, along with my agronomist, worked through our in season challenges to help me achieve my yield goal of 300 bushels, which was unheard of in my area."

MARK SCHLEISMAN
LAKE CITY, IA

"We like planting AgriGold for two reasons: 1.) Our AgriGold representative helps us pick the best hybrids available for our situations, and 2.) When we plant these hybrids, they perform as expected, or better... yield, and great agronomics."

ANNIE DEE
ALICEVILLE, AL

"We have had great success using AgriGold products for many years. We look forward to planting AgriGold into the future. The service we receive from AgriGold is by far the best of any seed company at the present time."

THE PRICE FAMILY

"AgriGold has the best service of any company I've ever worked with. From sales to agronomy, they care about our success, and most importantly, they have a line-up of hybrids that is second to none."

- Ben Price, Chillicothe, MO

2019 NCGA YIELD RESULTS

Our most successful growers have more in common than just the high-yielding seed they use. That's because they all know maximizing their acres is a team effort. It takes a combination of the best genetics, know-how and true partnership to be a Yield Master.

ELITE CORN HYBRIDS

CORN YIELD MASTERS

An AgriGold Yield Master is relentless in their pursuit of higher yields. Yield Masters work hand-in-hand with the AgriGold agronomy team to develop ground-breaking agronomic strategies, driven by our industry-leading knowledge of our premium hybrid genetics.
