

TRAIT MODE OF ACTION COMPARISON

AgriGold works with industry leading trait providers to offer the very best protection from pests that rob yield. We sort through all available platforms to offer protection at the right level no matter the conditions faced.

Understanding the pests and the risk potential each can have on your crop's yield allows the selection of the right trait for your needs. The following information is a quick comparison of AgriGold's trait offering and competitive traits. As a corn grower, it is important that you understand what insect protection, refuge requirements and herbicide tolerances are available with each platform. This knowledge is priceless!

8 trait max protection with 5% RIB*
The all-in-one corn trait with root, stalk & ear protection

PROTECTION MIN MAX

Unmatched above ground insect control with 3 modes of action to manage Corn Earworm pressure

PROTECTION MIN MAX

2 modes of above-ground protection with rootworm protection and 10% RIB*
Controls Corn Earworm & provides a 20% refuge in the South

PROTECTION MIN MAX

2 modes of above-ground protection with 5% RIB*
2 modes of insect protection for better above-ground control

PROTECTION MIN MAX

Requires 20% structured refuge
A breakthrough in insect control that provides control of 16 damaging insect pests

PROTECTION MIN MAX

2 modes of action against ear-feeding corn insects and corn borer to reduce mycotoxin contamination
Ideal for areas where corn rootworm management is not a key need

PROTECTION MIN MAX

Paired with VT Double PRO®, DroughtGard® products can reduce risk in reduced water environments

PROTECTION MIN MAX

Roundup® / glyphosate tolerant
Manage weeds with Roundup Ready® Corn 2

PROTECTION MIN MAX

2 modes of action against ear-feeding corn insects and corn borer to reduce mycotoxin contamination
Paired with Artesian™ to maximize yield when it rains and increase yield when it doesn't

PROTECTION MIN MAX

Our elite genetics offered without traits

PROTECTION MIN MAX

*Refuge in-the-bag for Corn Belt only.
