Here we’ll discuss ways you can integrate tools like Advantage Acre into your current farming practices.

**PRE-PLANT**
- Optimize your seed plan
- Gain insight on hybrid placement
- Improve on-farm communication

**IN-SEASON**
- Improve field visibility
- Insight to plant health
- Mitigate risk

**HARVEST**
- Analyze results
- Gain insight into performance
- Utilize data + analytics

There’s something happening in your fields ... it’s nothing you can see, smell or taste, but it could have a big impact on your farm. It’s multiplying by the trillions daily. It’s in your soil, your crops and it’s even in your machinery. It travels in every rain droplet and every August GDU. That something is data ... and in that data lies the knowledge to improve your management practices, reduce risk and maximize yield on every acre you farm.

This is why AgriGold® is investing in digital ag technologies and leading the digital transformation of the seed industry. While this is a very exciting time in agriculture, we also know it can mean uncertainty and apprehension for many as they look to integrate new digital tools into their farming practices.

To support you in this task, we are introducing a comprehensive plan that will allow you a simplified path to greater optimization and visibility over your farm, fields and operation.
ADVANTAGE ACRE PLANNING

We’ve combined our knowledge of genetics, the comprehensive understanding of soil and WeatherTrends360® advanced forecast to assign a productivity index to each unique environment.

With this enhanced, dynamic knowledge, our recommendations may change from year to year. Rely on our AgriGold Representatives to help you place the right genetics on the right acre. Starting with a sound seed and agronomic plan will help guide decisions throughout the season.

WHAT WILL THE WEATHER BE LIKE THIS YEAR?

REVIEW 11-MONTH WEATHER FORECASTING
Get a clearer picture of future conditions with WeatherTrends360® to make more proactive decisions on your farm without using previous years’ data.

WHAT’S MY HYBRID PLACEMENT + POPULATION PLAN?

TUNE FIELD-BY-FIELD PLANNING
Understanding how to maximize your seed’s potential begins with genetic knowledge. Utilize our field-by-field planning approach to reduce risk and maximize yield.

HOW DO I DETERMINE FERTILIZER + TILLAGE PRACTICES?

STUDY FUNCTIONAL SOIL MAPS
While standard USDA soil maps generally classify and name soil types as broad units based on appearance, functional soil mapping focuses on soil behavior and topography with a three-dimensional approach.

HOW DO I REDUCE RISK?

STRATEGIC PRODUCT PLACEMENT
AgriGold classifies every one of its hybrids into genetic families based on its genetic background and agronomic characteristics. Knowing a hybrid’s genetic family helps simplify management, reduce risk and maximize results in your field.
Ensuring proper seed placement is critical to obtaining higher yields. Optimize your planting practices by using our seeding recommendations for static and variable rate planting.

Utilize our test blocks to validate appropriate planting populations on every acre. To have a premier in-cab experience, pair our recommendations with Climate FieldView™ to experience real-time results.

**HOW DO I VALIDATE MY SEEDING RATE?**

**WHAT IS THE BEST PLANTING DATE?**

**WHAT IS MY OPTIMAL SEEDING RATE?**

**HOW DO I INCREASE MY EFFICIENCY?**

**TEST BLOCKS**
Easily set up test blocks to determine the best population on each field by creating seeding recommendations in Advantage Acre.

**ENHANCE IN-CAB VISIBILITY**
Pair Advantage Acre’s recommendations and timeline feature to help make informed decisions with Climate FieldView™’s in-cab features to make on-the-go decisions.

**EXPRESS VR RECOMMENDATIONS**
Easily export your seeding plan to your monitor or link it to your cab using MyJohnDeere® or Climate FieldView™.

**VERIFY EARLY SEASON WEATHER**
Utilize the timeline feature in Advantage Acre® to help determine when an optimal planting date might be.

**WHAT IS THE BEST PLANTING DATE?**

**MAXIMIZED PERFORMANCE POTENTIAL**

**STRATEGIC HYBRID PLACEMENT**

**OPTIMIZED MANAGEMENT PLAN**

---

Individual results may vary. For services information, visit http://climate.com/disclaimers. FieldView® is a trademark of The Climate Corporation.
Mitigate risk by monitoring your crop all summer long. Work with your local AgriGold Representative and the Advantage Acre® scouting app for enhanced visibility of your fields.

Using these tools can help gain greater insights into your plants’ health along with our complementary tools in collaboration with Climate FieldView™ and MyJohnDeere®.

HOW IS MY CROP PROGRESSING?

ESTIMATED GROWTH STAGE DEVELOPMENT
Utilize GDU accumulations and the scouting app to monitor your plants’ health and determine how the plant will mature with this year’s weather forecast.

DO I NEED TO MODIFY APPLICATIONS?

REVIEW NITROGEN AVAILABILITY
Advantage Acre’s nitrogen availability tool can help you have a better understanding of the amount of nitrogen available and the amount of loss you have in each field.

DO I HAVE ANY CHALLENGE ZONES?

REAL-TIME MONITORING OF FIELD HEALTH
Use imagery to see your fields like never before by using the Field Health Advisor in Climate FieldView™.

UNCOVER VALUABLE FIELD INSIGHTS
Uncover valuable insights for next season with tools that help you analyze crop performance at the field level or by field zone. Use in-season imagery to identify issues early and take action to protect yield.
Because of your access to information and enhanced visibility, you can make more informed decisions in-season.

The actionable insights derived from Advantage Acre® and other complementary platforms can help protect yield potential before harvest.
## ADVANTAGE ACRE
### HARVEST
Collecting harvest and yield data confirms visual cues on critical decisions made in your seed and agronomic plans.

Visual inspection from the combine along with in-cab analysis tools provide instant feedback.

WHAT CROPS WILL I PLANT AND WHERE?

ADJUST SEED PLANS FOR NEXT YEAR
Work with your local AgriGold Representative to help review which hybrids and populations were most successful and create a seed plan for next year.

SHOULD I ADJUST MY AGRONOMIC PRACTICES?

VALIDATE TEST BLOCKS
Review your seeding recommendations to gain greater insight into your season’s successes and determine what changes need to be made.

WHAT WAS AN OPTIMAL PLANTING RATE?

SET OPERATIONAL + BUDGETARY GOALS
Evaluate crop performance using both Advantage Acre® and Climate FieldView™ to understand performance on every field and compare critical field layers to determine how agronomic practices impacted yield.

HOW DO I REDUCE RISK AND IMPROVE ROI?

YIELD RESULTS
Upload your yield results and review your management practices to determine if the best in-season decisions were made based on productivity.

WHAT CROPS WILL I PLANT AND WHERE?

GREATER INSIGHT INTO SEASON SUCCESS

SINGLE SOURCE FOR DATA + ANALYTICS

Easily analyze performance by hybrid, functional zone, cation exchange capacity and more by using our advanced analysis features in Advantage Acre® Plus and tools in Climate FieldView™. Together, both platforms unlock enhanced field visibility to allow you to gain a deeper insight at a field-by-field level.
